

# ReSolution

Training to (re)mobilize audiences  
remote from employment

The project **#ReSolutionEU** has the goal to **develop free resources for employment insertion professionals** with the purpose of innovating the practices in the area of positive remobilization of people far away from employment. The project will contemplate training tutorials, online courses and will create a set of recommendations for usage of the created material.

More specifically, the project will allow free access to:

- Training courses for professionals to acquire the skills necessary for a positive engagement with the target public - people far away from employment - and to facilitate their socio-professional integration;
- Transferable know-how materials between the different countries involved and in other non-project countries;
- Digital tools to increase the cooperation between training and socio-professional actors.

In this context, an online environment will be created to disseminate several resources for insertion professionals.

The **#ReSolutionEU** resources will be made available freely:

- A toolbox of innovative practices in the area of positive remobilization of people far away from employment;
- A training tutorial;
- A dedicated MOOC - Massive Open Online Course.
